Summary of investment

Harbor Point Residences is a 120-unit multifamily ground-up development in Stamford, CT of about 132,000 SF. The plan is to buy the site for $7.00M, build over 24 months, lease up over 17 months to stabilisation in month 43, and sell in month 48. Total cost is $44.64M ($372,009 a unit), funded by $16.57M of equity (37.00%) and a $28.07M construction loan at 7.25% (63.00% of cost). There is no permanent takeout: the $28.07M construction loan stays outstanding after stabilisation and is repaid from the sale proceeds at month 48.

In the Base case the deal returns **33.09%** levered and **2.71x** ($28.69M of profit on $16.57M of equity), and 22.32% before financing: **21.1 points above** the 12.00% hurdle. The return rests on a 8.91% stabilised yield on cost against a 5.00% exit cap (391 bps of development spread), and 94.00% of what equity gets back arrives at the sale. It stays above the hurdle if the exit cap widens by up to 208 bps, or rents fall 23.00%, or hard costs overrun by 56.00%, one at a time.

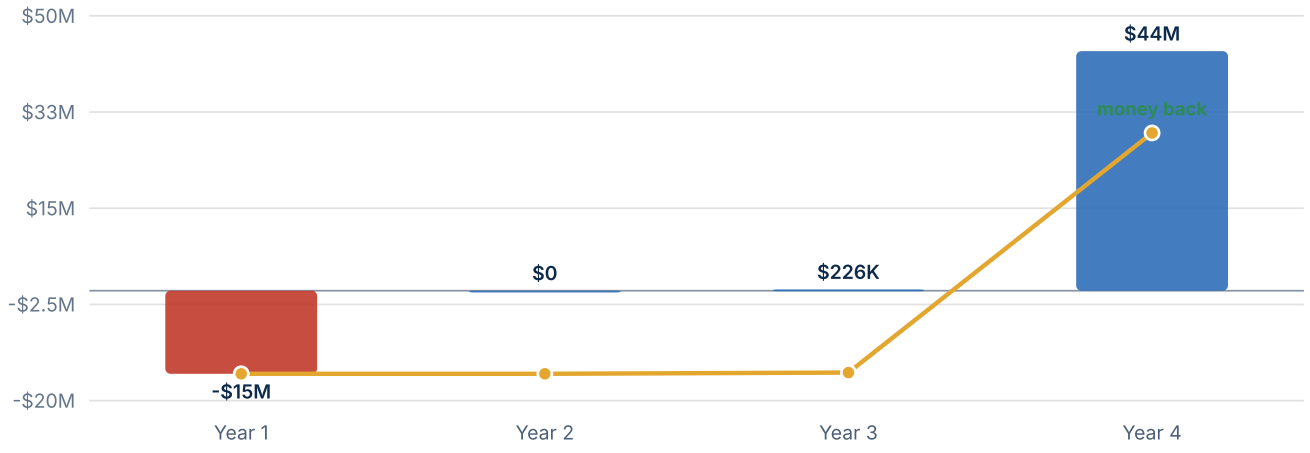

Model checks: 0 failed, 2 warnings, 21 passed, 0 not applicable; to know: interest accrues beyond the loan commitment; costs exceed what equity plus the commitment can fund. Credit gate: **CONDITIONAL**. These are projections from the assumptions entered, not guarantees; see the pages that follow for the basis of each figure.

Levered return against the hurdle

Equity cash flow

Each year's cash to equity; the line is the running total. Equity is funded through construction and lease-up, then returned from operations, the takeout and the sale.

RETURNS AND WHAT THEY REST ON

PROPERTY

Total development cost (before financing)	$39,950,000 · $332,917 per unit · $303 per GSF
All-in cost (with fees and interest)	$44,641,091
Stabilised NOI (after reserves)	$3,558,877
Yield on cost	8.91%
Development spread over exit cap	391 bps
Gross / net sale value	$72.25M / $70.80M
Unlevered profit	$34,229,818
Unlevered IRR / multiple	22.32% / 1.86x

EQUITY, LP AND GP

Equity requirement (peak contributed)	$16,574,091
Total contributions / distributions	$16,782,457 / $45,473,327
Levered profit	$28,690,870
Levered IRR / multiple	33.09% / 2.71x
Equity beyond the planned amount	$1,459,877
LP: contributed · IRR · multiple	$15,104,211 · 26.77% · 2.27x
GP: contributed · IRR · multiple	$1,678,246 · 69.76% · 6.63x
GP promote	$6,572,919

Contributions and distributions are gross: equity called, and any month's cash shortfall the partners fund, are contributions; the surplus is a distribution. The multiple is total distributions over total contributions. IRRs are XIRR on actual dated cash flows. Equity payback is month 48 of 48.

> The deal clears its 12.00% hurdle by **21.1 points** at 33.10% levered (22.30% unlevered): leverage adds about 10.8 points, at the cost of $3,185,837 of capitalised interest and equity paying $1,459,877 beyond the plan.

> The return is mostly a sale return: $42.73M comes back at exit after repaying $28.07M of debt. The stabilised yield on cost of 8.91% against a 5.00% exit cap is the whole development spread: each 25 bps of exit cap moves the sale value by about $3.44M.

BUDGET AND FUNDING

SOURCES	AMOUNT	%
Construction loan - draws	$24,881,163	55.74%
Construction loan - interest capitalised	$3,185,837	7.14%
Equity	$16,574,091	37.13%
Total sources	**$44,641,091**	**100.00%**

Equity requirement includes any overflow beyond planned equity. Returns are measured on cash actually contributed, net of lease-up income ($16.78M).

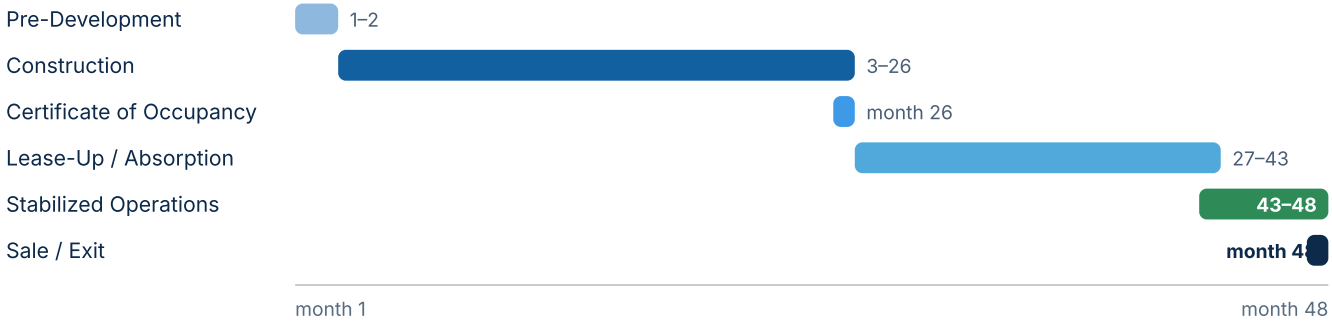

USES	AMOUNT	%
Land	$7,000,000	15.68%
Closing costs	$250,000	0.56%
Pre-development	$750,000	1.68%
Hard costs	$26,950,000	60.37%
Soft costs	$5,000,000	11.20%
Capitalised interest	$3,185,837	7.14%
Interest paid by equity beyond the loan commitment	$1,224,583	2.74%
Loan fees	$280,670	0.63%
Total project cost	**$44,641,091**	**100.00%**

Cost to date and loan balance

Cumulative cost including capitalised interest (dark) and the construction loan balance (blue), by month from closing.

Figures in thousands of dollars. Each quarter's costs are funded by equity first, then the construction loan; interest is capitalised into the loan up to the commitment. Every figure is the funding engine's monthly schedule rolled up by quarter, through stabilisation.

UNIT ECONOMICS, OPERATIONS AND LEASE-UP

UNITS AND RENT

Units	120
Average rent / unit / month	$3,310
Annual potential rent	$4,766,400
Rent per unit per year	$39,720
Rent per GSF per month	$3.01

The unit mix by type is not entered for this deal; the model uses the units at an average rent. Enter it on Dev Lease-Up (by unit type) to show it here.

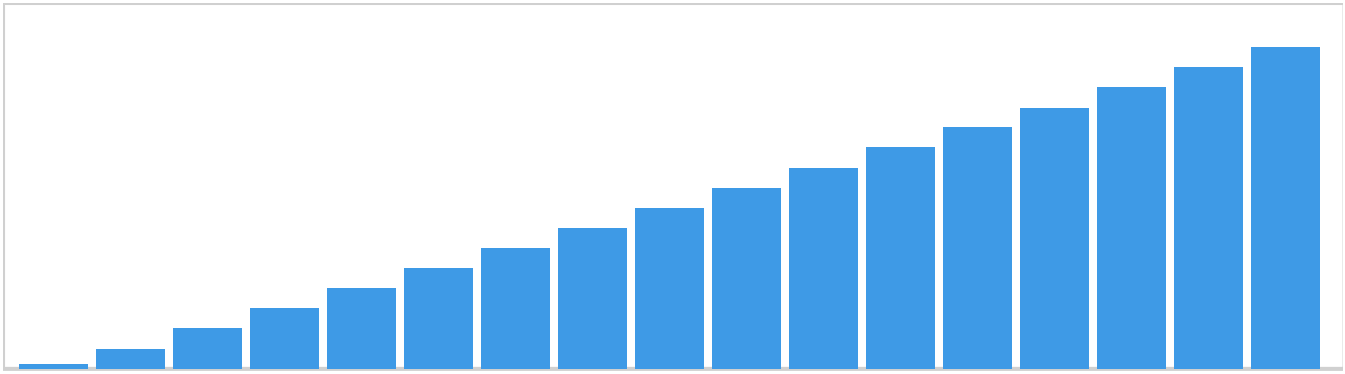

STABILISED OPERATING STATEMENT (ANNUAL)

Gross potential rent	$4,766,400
Vacancy and credit loss	($238,320)
Other income	$252,000
Effective gross income	**$4,780,080**
Operating expenses (incl. management $191,203)	($1,185,203)
Net operating income (before reserves)	**$3,594,877**
Replacement reserves	($36,000)
Cash flow after reserves	**$3,558,877**

Stabilised NOI is derived from the rent and expense inputs; it is never forced to a target. Expense ratio 24.80% of EGI.

Lease-up schedule

Construction completes in month 26; leasing runs 17 months to stabilisation in month 43. Occupancy ramps in a straight line; fixed costs run in full from completion, so the early months lose money.

month 26 — month 42 · 94.00% occupied

MONTHS	OCCUPANCY (END)	EGI	NOI AFTER RESERVES
Months 26–28	12.00%	$70,295	($190,017)
Months 29–31	29.00%	$281,181	$12,434
Months 32–34	47.00%	$492,067	$214,884
Months 35–37	65.00%	$702,953	$417,335
Months 38–40	82.00%	$913,839	$619,785
Months 41–42	94.00%	$726,385	$525,663

Rent growth 3.00% and expense growth 3.00% a year apply after stabilisation. Concessions: none.

FINANCING AND DEBT METRICS

CONSTRUCTION FACILITY

Facility commitment (LTC 65.00% formula)	$28,067,000
Interest rate / origination fee	7.25% / 1.00%
Loan draws	$24,881,163
Capitalised interest	$3,185,837
Interest paid by equity once the commitment is full	$1,224,583
Peak balance (before sale)	$28,067,000
Headroom left in the commitment	$0
Unused-commitment fee	none entered
Repayment	Held after stabilisation (interest paid currently); $28,067,000 repaid from the sale

COVERAGE AND LEVERAGE

Loan to cost (all-in)	62.87%
Loan to value (stabilised value $72.08M)	38.94%
Debt yield (NOI / loan)	12.68%
Debt service coverage (stabilised NOI / annual debt service)	1.75x
Interest coverage	1.75x (interest only)
Annual debt service after stabilisation	$2,034,857

REFINANCE ALTERNATIVE AT STABILISATION (MONTH 43)

Permanent loan (65.00% LTV, no coverage test)	$46,850,000
Rate / amortisation	6.25% / 30 years
Repays the construction loan	$28,067,000
Refinance fees	$468,500
Net cash out to equity	$18,314,500
Takeout shortfall equity must fund	$0
Annual debt service	$3,461,562
DSCR / debt yield / LTV	1.04x / 7.69% / 65.00%
Value of the retained property (5.00% cap)	$72,077,280
Equity left in the deal	$25,227,280

Sized at the model's permanent-loan LTV with the coverage test switched off, so the coverage shown is what that loan would run at. A lender testing 1.25x coverage would lend less. This is a stabilisation-date illustration: the model still values and sells the property at the end of the hold; it does not model holding it afterwards.

DEVELOPMENT BUDGET

DEVELOPMENT BUDGET	AMOUNT	PER UNIT	PER GSF
Land	$7,000,000	$58,333	$53
Closing costs and acquisition fee	$250,000	$2,083	$2
Predevelopment	$750,000	$6,250	$6
Hard cost: trades	$22,250,000	$185,417	$169
Hard cost: general conditions, contractor fee and bonds	$2,700,000	$22,500	$20
Hard cost: contingency	$2,000,000	$16,667	$15
Hard costs, total	**$26,950,000**	**$224,583**	**$204**
Soft costs	$5,000,000	$41,667	$38
Total development budget	**$39,950,000**	**$332,917**	**$303**

Financing costs come on top and are on the Financing page: loan fee and unused-commitment fees $280,670, capitalised interest $3,185,837. Cost before financing and reserves is $39,950,000 ($303 a GSF).

HARD COST TRADE	AMOUNT	PER GSF
Site Work, Utilities & Off-Sites	$1,750,000	$13
Excavation, Shoring & Foundations	$2,000,000	$15
Concrete Podium & Superstructure	$3,650,000	$28
Exterior Envelope, Glazing & Balconies	$2,950,000	$22
Roofing, Waterproofing & Membrane	$550,000	$4
MEP & Fire Protection	$4,500,000	$34
Elevators & Conveying	$500,000	$4
Unit Interiors - Cabinets, Appliances, Fixtures	$4,550,000	$34
Amenity & Common Area Fit-Out	$1,000,000	$8
Landscape, Hardscape & Streetscape	$800,000	$6

SOFT COST LINE	AMOUNT	PER GSF
Architecture & Engineering	$1,480,000	$11
Civil, Landscape & Specialty Consultants	$370,000	$3
Environmental, Geotech & Survey	$200,000	$2
Entitlement, Zoning & Community	$300,000	$2
Permits, Impact, Utility & Housing Fees	$700,000	$5
Legal, Accounting & Organizational	$350,000	$3
Real Estate Taxes During Construction	$450,000	$3
Owner-Controlled Insurance Program	$300,000	$2
Marketing, Branding & Leasing Center	$250,000	$2
Testing, Inspection & Commissioning	$250,000	$2
Construction Management Fee to Sponsor	$350,000	$3

CONTINGENCY

No contingency register is entered. Contingency is the $2,000,000 in the hard-cost ladder and is spent in full in the budget.

INITIAL RESERVES

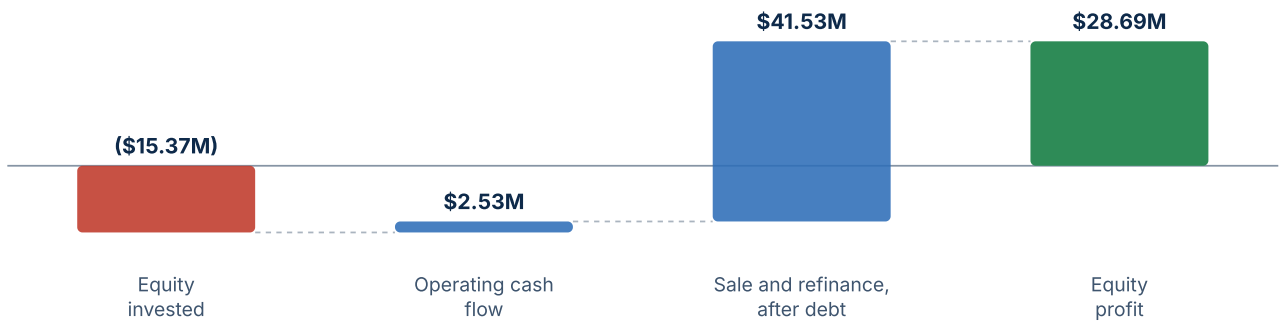

No initial reserves are entered.

PERFORMANCE AND SENSITIVITY

ANNUAL CASH FLOW	YEAR 1	YEAR 2	YEAR 3	YEAR 4
Net operating income	–	–	293,031	3,086,492
Debt service	–	–	–	(847,857)

Cumulative	**(15,114,213)**	**(15,114,213)**	**(14,888,178)**	**28,690,870**

Where the profit comes from

Equity in, operating cash flow, then takeout and sale proceeds net of the loan.

Return sensitivity

Levered IRR as exit cap and rent growth move.

	4.50%	4.75%	5.00%	5.25%	5.50%
2.00%	38.80%	35.74%	32.81%	29.99%	27.27%
2.50%	38.94%	35.88%	32.95%	30.13%	27.42%
3.00%	39.08%	36.02%	**33.09%**	30.28%	27.57%
3.50%	39.22%	36.16%	33.24%	30.42%	27.71%
4.00%	39.36%	36.30%	33.38%	30.57%	27.86%

Levered IRR. Columns: exit cap rate. Rows: annual rent growth. Green meets the 12.00% hurdle, red is furthest below it. Outlined cell is the base case.

KEY ASSUMPTIONS

Land	$7.00M
Hard costs	$26.95M ($224,583/unit)
Soft costs	$5.00M
Construction	24 months
Lease-up	17 months
Exit cap rate	5.00%
Rent growth	3.00% / yr
Hold	4 years

WHAT BREAKS THE DEAL

Each break-even reruns the full model with one input moved until the levered IRR reaches the 12.00% hurdle (or equity just gets its money back). Red = below the hurdle. In the combined cases cost is the hard-cost overrun in %, rent the change in %, rate and cap the change in bps.

Exit cap rate at which the levered IRR equals the 12.00% hurdle	7.08% (+208 bps)
Exit cap rate at which equity gets its money back (1.00x)	8.41% (+341 bps)
Break-even sale value (equity profit zero)	$42.97M against $72.25M base (41.00% cushion)
Average rent at which the levered IRR equals the hurdle	$2,561 (-23.00% vs base)
Average rent for 1.00x coverage of the stabilised debt service of $2,034,857	$2,150 (-35.00% vs base)
Break-even occupancy for 1.00x coverage	61.70% (base 95.00%)
Hard-cost overrun at which the levered IRR equals the hurdle	+56.00%
Land price at which the levered IRR equals the hurdle	$20,759,470 (197.00% vs base)
Construction delay the deal can absorb before the IRR falls below the hurdle	more than 36 months

Delays move the sale by the same number of months. Cost overrun applies to hard cost including contingency. DSCR is stabilised NOI over annual debt service after stabilisation.

GP cash flow	**($870,000)**	**($641,421)**	**–**	**$22,604**	**$10,930,824**
GP promote (above its 10.00% pro rata share)	–	–	–	–	$6,572,919

Hurdle accounts accrue monthly at each hurdle rate on the LP's own contributions and are reduced only by what the LP receives, so a tier opens once the LP has reached that return. Close is the equity contributed at closing. Every figure is the engine's monthly waterfall rolled up by year.

CREDIT DECISION

CREDIT GATE	DEAL	POLICY	RESULT
Gross levered IRR (property) (hard)	33.09%	>= 12.00%	PASS
Net LP IRR (after promote) (hard)	26.77%	>= 12.00%	PASS
Net LP equity multiple	2.27x	>= 2.00x	PASS
High or critical risks	0	<= 2	PASS
Development spread (bps, development only) (hard)	330.07	>= 150	PASS

Decision: CONDITIONAL

CONDITIONAL — 2 MODEL WARNINGS

Model warning: Interest accrues beyond the loan commitment

Model warning: Costs exceed what equity plus the commitment can fund

Model integrity: 0 failed, 2 warnings, 21 passed, 0 not applicable.

Next step: The credit gates pass, but 2 model warnings stand: Interest accrues beyond the loan commitment; Costs exceed what equity plus the commitment can fund. Approval is conditional on resolving or accepting them.

DELAY AND EXIT STRESS

STRESS TEST	LEVERED IRR	MULTIPLE	PROFIT	VS HURDLE
Base case	**33.09%**	**2.71x**	**$28.69M**	MEETS
Construction 6 months longer	31.58%	2.60x	$26.60M	MEETS
Lease-up 6 months slower	31.19%	2.54x	$26.67M	MEETS
Exit cap 50 bps higher	27.57%	2.33x	$22.25M	MEETS
Rent growth 1 point lower	32.81%	2.69x	$28.34M	MEETS
Delays and exit cap together	18.52%	1.79x	$13.25M	MEETS

Each row reruns the full model with the change shown. Cost-overrun stress is not shown: with the budget set from a source total, hard-cost changes are absorbed in the calibration.

ABOUT THIS SUMMARY

Prepared November 4, 2026 from the Punchlist Capital underwriting model (beta). Every figure is read from the live model for the Base case; the sensitivity grid and stress tests rerun the model. Development returns depend heavily on cost, schedule and exit assumptions. This summary is an analytical aid, not an offer or a fairness opinion. Check it against your own model before relying on it.

IMPACT TO PORTFOLIO

First deal in the portfolio: N/A
No other underwritten assets are saved in BK Capital, so there is no portfolio to compare against. This deal would be the first asset; the figures below are the deal on its own.

This deal on its own	Development · Multifamily
Equity invested / total cost	$16,782,457 / $39,950,000
Levered profit	$28,690,870
Levered IRR / multiple	33.09% / 2.71x

Once other deals are saved to the portfolio, this page shows the current assets and what adding this one changes: equity and leverage, the equity-weighted and combined (dated cash flow) IRR, the multiple, concentration in the largest asset, and the mix by property type and by development versus acquisition.

MODEL INTEGRITY AND LIMITS

Every line is recomputed independently of the engine (0 failed, 2 warnings, 21 passed, 0 not applicable). A failed check holds the credit gate; a warning caps it at conditional.

AREA	CHECK	RESULT
Budget	Hard and soft cost totals equal the sum of their lines	PASS
Budget	Cost before financing equals land + closing + acquisition fee + pre-development + hard + soft + lease-up deficit	PASS
Sources & Uses	Total sources equal total uses	PASS
Debt	Every month's cost is paid by equity or a loan draw (debt draws follow costs)	PASS
Debt	Capitalised interest equals the opening balance x rate / 12 each month, and the balance rolls forward	PASS
Debt	The loan balance never exceeds the commitment	PASS
Debt	The debt repaid at sale equals the outstanding balance	PASS
Exit	Net sale proceeds equal the gross sale value less selling costs	PASS
Equity	The equity charged in the returns cash flow equals the equity in the funding ledger	PASS
Equity	LP + GP contributions equal total contributions: the equity ledger plus any operating shortfall the partners fund	PASS
Returns	Unlevered IRR and multiple are calculated	PASS
Debt	Interest accrues beyond the loan commitment	WARNING
Equity	Costs exceed what equity plus the commitment can fund	WARNING
Returns	Levered IRR equals an independent XIRR of the dated cash flows	PASS
Returns	Equity multiple equals total distributions / total contributions	PASS
Waterfall	Tier 1 · preferred return	PASS
Waterfall	Tier 2 hurdle	PASS
Waterfall	Tier 3 hurdle	PASS
Waterfall	Tiers are paid in order	PASS
Waterfall	Every dollar is distributed once	PASS
Waterfall	Promote is the GP's excess over its pro-rata share	PASS
Waterfall	Distribution categories add to each partner's distributions	PASS
Waterfall	LP IRR equals an independent XIRR of the dated LP cash flows	PASS

Credit gate: CONDITIONAL

CONDITIONAL — 2 MODEL WARNINGS

> **Warning:** Interest accrues beyond the loan commitment — $1,224,583 of interest accrues after the commitment is full and is paid by equity. Either the commitment is too small for the plan or the interest reserve is short.

> **Warning:** Costs exceed what equity plus the commitment can fund — $235,294 of costs are funded by equity over the planned amount ($15,114,213).

WHAT THIS MODEL CANNOT YET DO

- Costs are entered as 13 hard-cost trades and 16 soft-cost lines; lines in a brief are merged to fit, and each cannot be escalated or reforecast on its own.
- The contingency register tracks allocations, change orders and forecast; it does not post spending against individual cost lines. Initial reserves are tracked in total by purpose, not as separate balances per reserve.
- Interest is capitalised only through stabilisation; the brief's capitalisation through the sale is not an option.
- Who earns the preferred return and what the GP catch-up runs to are taken from the deal's inputs; where the offering documents are silent they are the deal team's to confirm.
- A refinance is illustrated at stabilisation; the property is still sold at the end of the hold.
- Source citations, extraction confidence and broker-versus-model discrepancy reporting are not part of this summary.
